COLONIAL HOUSE

Leonardo Martin Casares
Shelley Farrell
Antonio Jesus Holguin

Our design proposal employs the architectural logic of the existing house which uses the courtyard to organize and facilitate connections between guests, between programs, and now between guests and the landscape.

Renovation of the traditional house retains the formal character of the plan, arranging six new guest cabins, an expanded group kitchen and formal dining room, outdoor quincho, indoor and outdoor archaeological galleries, and hillside tower around a pair of courtyards.

STRATEGY

Our design proposal creates view corridors in the house to provide guest with a visual connection to the pristine landscape where their food is grown and nature flourishes.
